DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-5 are rejected under 35 U.S.C. 102(e) as being anticipated by Loose et al. (US 6,517,433 B2).

Regarding claim 1, Loose et al. disclose a gaming machine comprising: a game result display means for displaying a game result thereon and a beneficial state generating means for generating a beneficial state for a player when a predetermined game result is displayed on the game result display means (see 'winning state' of col. 3: ln 40-col. 4: ln 18). Additionally, Loose et al. disclose that the game result display means includes first display means and second display means arranged at a more front side than a display area of the first display means when seen from a front side of the gaming machine (see Fig. 1 and Figs. 2(a-b) and the related description thereof). Furthermore, Loose et al. disclose that the first display means includes a plurality of symbol display parts capable of variable displaying one or more of the symbols and conducting stop display information and the second display means has symbol display areas through which the symbols displayed on the first display means are transmittably displayed and

window frame display areas are formed around the symbol display areas in the second display means (see col. 5: ln 30-42).

Regarding claim 2, Loose et al. disclose a gaming machine wherein the display mode of the window frame display area is changed (see col. 3: ln 41-55, col. 4: ln 60-col. 5: ln 22).

Regarding claim 3, Loose et al. disclose a gaming machine wherein a light transmittance rate of the symbol display area in the second display means is changed when the display mode of the window frame display area is changed (see reels [12a] and direct image and virtual image [14a-b] of Fig. 2(a-b) and the related description thereof).

Regarding claim 4, Loose et al. disclose a gaming machine wherein the display mode of the window frame display area is changed substantially at the same time that the stop display of the symbol is conducted (see Figs 10(a-c) and the related description thereof).

Regarding claim 5, Loose et al. disclose a gaming machine comprising an internal winning combination determination means for determining an internal winning combination (see col. 5: ln 50-col. 6: ln 16). Additionally, Loose et al. disclose a gaming machine wherein the display mode of the window frame display area is changed when the internal winning combination determination means determines a predetermined combination as the internal winning combination (see Figs. 8(a-c), 10(a-c) and the related description thereof).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Motegi et al. (US 6,817,946 B2) – Virtual Image and Real Image Superimposed Display Device, Image Display Control Method and Image Display Control Program.

Art Unit: 3714

Weiss (US 6,164,645) – Gaming Machine.

Sakamoto (US 6,315,663 B1) – Game Machine and Method with Shifting Reels in Two Directions.

Uchiyama (US 6,638,165 B2) – Virtual Image/Real Image Superimposing and Displaying Apparatus and Slot Machine.

Any inquiry concerning this communication or earlier communication from the examiner should be direct to Ryan Hsu whose telephone number is (571)-272-7148. The examiner can normally be reached on M-F 8:30 AM - 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert P Olszewski can be reached at (571)-272-6788.
